

MANU K BINU

IT Project Manager | Technical Project Manager | Agile Delivery & Enterprise Software

UAE (Visit Visa) • +971 541 660 983 • mail4manukbinu@gmail.com • linkedin.com/in/manukbinu

Visa Period: 30 days (available immediately) • Open to hybrid or on-site roles in UAE

PROFESSIONAL SUMMARY

Technical Project Manager with 4+ years of experience leading Agile delivery of enterprise software across ERP, ESG compliance, and risk management domains. Track record of managing 2–3 simultaneous project workstreams end-to-end — requirement gathering, sprint planning, stakeholder communication, risk mitigation, and on-time delivery. Combines hands-on technical fluency in Angular, .NET Core, and SQL Server with strong cross-functional leadership. Differentiated by early adoption of AI-assisted project delivery (Claude AI, ChatGPT, prompt engineering) to improve sprint velocity, documentation quality, and team productivity. Currently based in UAE, available immediately.

CORE COMPETENCIES

- Agile & Scrum Delivery — sprint planning, daily stand-ups, retrospectives, backlog coordination
- Stakeholder & Client Communication — requirement gathering, status reporting, expectation management
- Multi-Project Coordination — managing 2–3 concurrent workstreams with competing priorities and deadlines
- Risk & Timeline Management — proactive identification of delivery risks and resource bottlenecks
- Cross-Functional Team Leadership — coordinating frontend, backend, QA, and business stakeholders
- AI-Enabled Project Delivery — using AI tools to accelerate documentation, planning, and quality reviews
- Enterprise Software Implementation — ERP, ESG compliance, and risk management platforms
- Technical Fluency — credible technical decision-making grounded in hands-on development background

MODULES

- Compliance Management** — *Area of Expertise:* Regulatory compliance tracking, audit-readiness, and reporting workflows for enterprise risk systems
- Hazard & Risk Assessment** — *Area of Expertise:* Risk identification, scoring logic, and real-time hazard data handling for enterprise risk platforms
- Sustainability Tracking** — *Area of Expertise:* Sustainability data capture and reporting modules supporting ESG and environmental compliance
- Manpower Management** — *Area of Expertise:* Workforce data management and resource allocation modules for enterprise ERP systems
- Rental Management** — *Area of Expertise:* Rental asset tracking, billing-adjacent workflows, and operational reporting for ERP systems

PROJECT MANAGEMENT SKILLS

- Agile, Scrum, Sprint Planning, Sprint Review, Sprint Retrospective
- Stand-up Facilitation, Stakeholder Management, Project Coordination
- Project Scheduling, Resource Allocation, Risk Management
- Timeline Management, Scope Management, SDLC, Kanban
- Requirement Analysis, Client Communication, Team Coordination
- Cross-Functional Leadership, Status Reporting, AI-Assisted Sprint Planning

TECHNICAL SKILLS

Frontend: Angular, TypeScript, HTML5, Responsive Design

Backend: .NET Core, REST APIs, Microservices, Strapi

Database: PostgreSQL, MySQL, SQL Server

AI & Productivity Tools: Claude AI, ChatGPT (code review, debugging, documentation, refactoring), Prompt Engineering, AI-Assisted Testing

Project & Collaboration Tools: Jira, Git, GitHub, GitLab, VS Code

Concepts: System Design, API Integration, Performance Optimization, RBAC, Microservices Architecture

PROFESSIONAL EXPERIENCE

Project Manager / Full Stack Developer

Ionob Innovations LLP | Feb 2025 – May 2026

- Managed 2–3 simultaneous enterprise software projects end-to-end, ensuring on-time delivery within scope using Agile/Scrum methodologies
- Facilitated Agile ceremonies — sprint planning, daily stand-ups, and retrospectives — while coordinating cross-functional teams and stakeholders
- Monitored project timelines, risks, and resource allocation across concurrent workstreams, optimizing workflows to improve team efficiency
- Integrated Claude AI and ChatGPT into the team's daily delivery workflow, reducing boilerplate generation time by ~40% and improving PR review turnaround
- Used AI tools to auto-generate API documentation, test cases, and sprint retrospective summaries — freeing the team to focus on complex feature delivery
- Applied prompt engineering to build reusable AI workflows for debugging, code refactoring, and requirements clarification
- Owned database design decisions and query optimization in SQL Server across multiple project deliverables
- Maintained close client coordination, translating business requirements into actionable sprint-level deliverables

Software Developer (Project Coordination & Delivery)

Redefine Technologies | Mar 2024 – Jan 2025

- Contributed to SATTVA, an enterprise Environmental & Risk Management System, coordinating delivery of compliance management, hazard assessment, and sustainability tracking modules
- Worked directly with backend teams and stakeholders to scope feature enhancements and align delivery with business requirements
- Participated in Agile development cycles, supporting sprint planning and ensuring frontend deliverables met sprint commitments
- Built responsive Angular/TypeScript UI components, improving usability for enterprise compliance and risk-tracking workflows
- Integrated REST APIs in collaboration with backend teams, ensuring consistent delivery across frontend and backend workstreams

Software Developer (Module Ownership)

Ionob Innovations LLP | Dec 2021 – Jan 2024

- Owned delivery of ERP modules for manpower and rental management systems, coordinating requirements across business and technical teams
- Designed and implemented RESTful APIs and microservices supporting full-stack enterprise application delivery using Angular and .NET Core
- Drove performance and scalability improvements through optimized architecture and MySQL Server query tuning
- Collaborated cross-functionally to ensure enterprise-level operational requirements were translated into reliable, scalable software
- Awarded Employee of the Year 2023 in recognition of consistent delivery performance and contribution to team goals
- Received the Quick Learner Award for rapidly adapting to new technologies and project requirements

KEY ENTERPRISE PROJECTS

SATTVA — Environmental & Risk Management System

Tech Stack: Angular, Strapi, PostgreSQL, REST APIs

- Coordinated delivery of compliance management, hazard & risk assessment, and sustainability tracking modules with real-time data handling
- Collaborated with cross-functional teams to scope and enhance system functionality across sprints
- Impact: Improved risk tracking and compliance reporting efficiency for enterprise operations; contributed to roadmap discussions on AI-based risk scoring

World Star ERP System

Tech Stack: Angular, .NET Core, MySQL Server, REST APIs

- Coordinated end-to-end delivery of ERP modules for manpower and rental management, including backend services and database architecture
- Drove architectural refactoring that improved system scalability and performance, streamlining business operations and resource management

EDUCATION

Diplomain Computer Engineering

Carmel Polytechnic College, Alappuzha | 2018 – 2021
